“Bossy Anja was in control now, and I’d be damned if I let either Ellri take that away from me.” Anja will endure anything to save her loved ones – torture, humiliation, showtunes, you name it. For Rob she’s sacrificed everything, even her last drop of blood, desperate to save him from Lodinn’s twisted revenge fantasy.

In this seventh Forged Bloodlines installment, Release Me When the Sun Goes Down, Anja realizes that the only way to defeat an enemy scarier than Jakob is to stop relying on a knight in shining armor to do it for her and fight him herself. In the process she finds the strength to take back her due and the man she loves. The answer to her problems lies in the birthplace of vampire mythology, and Anja embarks on a rescue mission to save her family and friends before they’re picked off one by one.
