The Megatech Series introduces children to the exciting world of cutting-edge science and technology. The ground-breaking history of computers, the internet, cloning, and life beyond our own planet is explored along with: -- developments for the future -- potential problems that come with the advancement of technology -- consequences for society and the environment -- glossary explaining scientific terms and concepts One hundred years ago, some astronomers thought they could see canals built on Mars. A space probe in the 1960s dashed this hope.

Alien Life Search takes a fascinating scientific look at our early ideas of extraterrestrials and what we know today including: -- the different galaxies of the universe -- which planets may have the right conditions to support life -- a scientific discussion of aliens, UFOs and how their spacecraft might work -- a realistic look at claims of extraterrestrial sightings -- a helpful glossary to explain scientific terms and concepts
