One hundred years in the future, Government Observers roam the classrooms of average learners, looking for the rare gifted learners still left in the general population. One gifted child, who has been carefully coached by his mother to appear average, is unaware that his abilities have been documented by an Observer for years, until he is tricked into showing his mathematical strengths. He is devastated to receive a letter requiring him to test at The School for Gifted Potentials, but he cleverly sabotages the tests and is prepared to leave, only to discover that his mother has abandoned him at the school she has raised him to fear. During his one week orientation, as he undertakes an enlightening journey of self-discovery, he uncovers a secret about his mother's past that leads him to question everything that he once believed.
