When 10-year-old Ethan's Blaine's parents decide to have another baby, it's the happiest day of their lives. But the sudden, unexplained death of the baby plunges their world into tragedy. And things get worse when Ethan's mother is accused of murder by an over-zealous doctor. With the help of his new book-wise friend Lexie Thatcher (a judge's daughter) Ethan does the only thing that any internet-savvy kid can do – he turns detective! By using the Internet and hacking into various computer networks, Ethan discovers a web of lies and corruption involving a devious doctor and a crooked social worker. But it turns personal when he finds out that his parents may be involved in a baby-selling racket. And with his mother's case now being heard by the jury, the intrepid Ethan realizes that he cannot solve the case from the comfort of his room and the safety of his computer.

He must go out into the world to find the answers – even if it means risking his life ... The Book: <http://bookstolistento.com/writers/4....> The author: <http://bookstolistento.com/books/book...>
