Imagine...meeting someone, and knowing instantly their most erotic thoughts. That's what happens when Kirsty survives an auto accident. A new experimental drug stops the brain swelling, but has unusual side effects. The first, being the ability to read someone's...anyone's mind. However, it doesn't stop there, as each new ability surfaces it leads her to the most erotic adventures of her life. ***This tale is graphic in nature and is meant for adults only*** All characters depicted are 18 or older.
