Silence 2 Success: a mother's journey with autism, is a personal journey into the world of Autism. My story begins with a difficult pregnancy and a heart-wrenching diagnosis to a successful, thriving young boy. This book provides insight into a mother's experience with therapy options and choices, working with the school district, finding family balance, and never accepting failure. One thing I know for sure, the decision to try multiple therapies, over time was an excellent choice, for our family. A child's needs change over time, so shouldn't the method of therapy do the same to best fit those needs? Jacob was diagnosed at 20 months old and I knew instantly that my purpose in life was to make sure he had the best opportunities for a successful life. I have learned an enormous amount of information on Autism and supporting interventions, but I also found the writing experience to be a journey of self-discovery. When I sat down to write, I was taken back to a time of intense emotions, sometimes despair, but most of all hope. We've come a long way and the future looks incredibly bright. Over the course of the last few years, working with Jacob, I have not only become a fierce advocate but also an advocate for other families with children on the spectrum in our community. I am amazed at how grateful people have been to hear our story and can only hope that this book will touch others that may be struggling with similar challenges.

I am just getting started on this new journey, of sharing my story and hope that you find it compelling too.
