This book is written specifically for all parents who want their children to have a deeper understanding of Islamic mysticism. But it is also written for those who want to give their children a clear view of how the spiritual reality, contained in every religion, manifests in the material world.

The book chronicles a living tradition of Sufi masters from the time of the Prophet (s) until the present day. The wonderful pictures include a treasure hunt in which the name of Muhammad (s) is hidden within the lines. The hidden names are high-lighted on the cover picture as an example. See if you can find the light of Muhammad (sas) hidden within all things.
