'Birth Stories' is a collection of beautifully written, candid stories by Australian women about the triumphs, challenges and delights they experienced through childbirth. The nineteen stories are from a wide range of mothers-to-be: first-time mums, women having their second or third child, women seeking to have a natural childbirth after a previous caesarian delivery, and women having babies after suffering traumatic first births or sexual abuse. Originally published as 'Having a Great Birth in Australia', this revised and updated collection of birth stories is a must read for any woman about to have a baby.
