The Traveler: The Amulet of Life is no longer available for purchase. Re-written and re-released early 2018 as The Fated Eighteen year old Callista Price has learned the hard way that life doesn't always turn out the way we expect.

Four years ago she witnessed the murder of her family in Chicago. Almost a victim herself, Cally was saved by a man she had never met, who disappeared immediately and left her with only the memory of the moment his eyes met hers. Haunted by a stranger she never expects to see again, Cally relocates to her grandparent's farm in Tennessee, spending her days wandering the land, unable to form any connection to the outside world. Until one day, the man she has been dreaming of returns, altering not only her life, but the very world she thought she knew.

Tate Harper is not just an ordinary man. He's a traveler, a free soul.

Physically they are natural holograms in solid form possessing powers that are almost limit and only bound by their mind, which acts as their source of power. Drawn together by a connection they don't understand, Cally and Tate fight to be together in an existence that neither one of them belong in. Tate finds himself

longing to be a part of Cally's world, while she grasps to understand his. An amazing story of love, adventure, and the existence of life outside of our own
