Glitch studies attempts to balance nonsense and knowledge.

It searches for the unfamiliar while at the same time it tries to de-familiarize the familiar.

This studies can show what is acceptable behavior and what is outside of acceptance or the norm. To capture and explain a glitch is a necessary evil that enables the generation of new modes of thought and action. When these become normalized, glitch studies changes its focus or topic of study to find the current outsider of a new technology or discourse. Glitch studies is a lost truth, it is a vision that destroys itself by its own choice of oblivion. The best ideas are dangerous because they generate awareness. Glitch studies is what you can just get away with.
